

History

We've always published about **ConT_EXt**, **T_EX** engines, **MetaPost**, and various related topics in user group journals and held presentations at meetings. In this section we collect some of the older (early) stuff.

At this moment you can find some about **pdfT_EX**, some articles that give an impression how **ConT_EXt** evolved in those days, and why some features are there. We used to describe some of that in more detail here but no longer do that. You can just browse and decide yourself if it's still useful.
